Portfolio: mehranmohammadifrd.ir

Profile

Frontend Engineer with 4+ years of experience building production web applications with Vue, Nuxt, TypeScript, JavaScript and modern frontend tooling. Focused on scalable product interfaces, clean component architecture, performance, RTL/Persian user experiences, dashboards, forms, API-driven flows and maintainable UI systems.

Core Skills

Core Stack: Vue.js, Nuxt.js, TypeScript, JavaScript, Tailwind CSS

Frontend Engineering: SSR, Component Architecture, State Management, REST API Integration, Performance Optimization, Responsive Design, RTL Interfaces

Also Worked With: React, Next.js, Svelte

Tools: Git, Vercel, Figma, npm/pnpm

Work Experience

Frontend Developer - Tosee Saman / TSIT

2022 - Present

- Built and maintained production web applications using Vue, Nuxt, JavaScript/TypeScript and modern frontend tooling.
- Developed reusable UI components, dashboards, forms, tables, filters and API-driven interfaces.
- Worked on RTL/Persian interfaces and responsive layouts.
- Collaborated with backend developers, designers and product stakeholders.
- Improved maintainability through cleaner component structure and reusable patterns.

Technologies: Vue, Nuxt, JavaScript, TypeScript, Tailwind CSS, REST APIs, RTL UI

Selected Projects

Bimehyar - Frontend Developer

Stack: Vue/Nuxt, Tailwind CSS, REST API, RTL UI

Built insurance-related user flows, responsive pages, form-heavy interfaces and API integrations. Managed multi-step user flows, validation and Persian RTL UX. Result: production-ready insurance platform UI with user-focused purchase and comparison flows.

SkillXP / RPG Skill Tracker - Personal Project / Frontend Developer

Stack: Nuxt/Vue, TypeScript, Tailwind, Vercel

Built a dashboard-like interface for XP, streaks, achievements and habit tracking with reusable components. Demonstrates product thinking, UI architecture and frontend implementation beyond simple landing pages.

IPEDCO / Tavan Sanat Shargh - Frontend Developer

Stack: Nuxt/Vue, Tailwind, Responsive UI

Built corporate website pages, product/service presentation, blog/article structure and contact sections. Result: professional company website suitable for presenting services, products and articles.

Additional Production Contributions

- Fars News: Contributed to frontend development of content-heavy responsive news interfaces.
- Virasty: Contributed to frontend screens, RTL layouts and component-based product UI.
- Msg Way: Contributed to dashboard-style communication product UI and API-driven interfaces.
- Gap Messenger: Contributed to responsive Persian messenger product UI patterns.
- Nasim Rezvan: Contributed to RTL service application screens, forms and workflows.

Selected Impact

- Built production web applications used by real users.
- Worked on complex RTL/Persian interfaces and responsive layouts.
- Experienced with Vue/Nuxt SSR applications.
- Built reusable components and scalable UI structures.
- Integrated REST APIs, authentication flows, forms, filters and tables.
- Focused on maintainability, performance and clean frontend architecture.
